Detailed Action

Response to Amendment

1. Applicant's amendment and accompanying Remarks filed 9-4-2003 have been entered and carefully considered.

The amendment is sufficient to overcome the anticipation rejection of claims 1,2,4,5 and the obviousness rejection of claim 3. Additionally, the 112 2nd paragraph rejections of claims 1-5 are overcome by way of the instant amendment.

2. Claims 1,2,4,5 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,849,091 to Cabrera et al as set forth in the previous office action.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,849,091 to Cabrera et al in view of US 3,919,115 to Stine et al as set forth in the previous office action.

Response to Arguments

4. Applicant argues that the claimed reactor is a fluidized bed reactor for converting oxygenates. while the Cabrera patent discloses a catalyst generator. However, the Applicant attempts to limit the structure of the claimed chemical apparatus through a recitation of intended use. A recitation of intended use of an apparatus is given no patentable weight provided that the prior art discloses all of the claimed elements. The Examiner takes the position that the apparatus disclosed by Cabrera et al and Stine et al is structurally identical to the structure of the apparatus claimed by the Applicant and can be used in any number of chemical apparatus applications including the application Applicant intended for the instant invention to be used for.

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
